

Lock Chocks

Lock Chocks have a unique system designed to fit your wheels for maximum contact surface and will not allow your aeroplane to move when chocked, they're locked.

Key features of Lock Chocks include:

- Each chock is personalised with your aircraft's registration or name to suit your requirements.
- Light weight and easy to carry - approximately 200 grams per set.
- The cupping system locks the wheels to stop movement giving you peace of mind when you are away from your aeroplane.
- Designed by an Aeronautical Engineer.
- Available in red for safety (other colours by special order).
- Marketed and prepared by two 11 year old kids.
- High and low profile chocks to fit tricycle (45mm) or taildraggers with spats (22mm).
- Guaranteed to be the best chocks you have ever owned.

Great value at only \$50 per wheel!
