

Maintenance Procedures Course Fees

Effective 1 July 2026

For over 15 years, the SAAA Maintenance Procedures Course (MPC), which covers regulatory matters relating to experimental aircraft has been a cornerstone of SAAA's safety and education program. Completion of an approved course in regulatory matters is a CASA requirement for those wishing to maintain an aircraft they have built.

Over this 15 year period, the MPC fee has only undergone one minor adjustment. However, due to increased operating costs, the MPC fee will increase from 1 July 2026.

From 1 July 2026:

Members who have been financial members for more than 12 months can purchase and access the MPC at the Member Loyalty Price. Members within their first 12 months of financial membership can purchase and access the MPC at the First Year Member Price.

Item	Description	Member Loyalty Price (GST Inclusive)	First Year Member Price (GST Inclusive)
MPC Initial	This is available to those wishing to complete the course for the first time.	\$1,200	\$1,440
MPC Refresher	This is available to those wishing to refresh their knowledge and be updated on any changes to legislation. The course and syllabus is the same for both initial and refresher attendees.	\$ 440	\$ 528
MPC for SAAA AP/TC	The course is available at no charge for SAAA TCs & SAAA APs in recognition of their significant contributions to guiding, advising and supporting our members through the building of their projects.	No Charge	No Charge
